Summary

Aspiring Machine Learning Engineer with a background in biomedical sciences and software development. Passionate about leveraging technology to solve real-world problems. Currently honing skills in full-stack development, data science, and AI while actively building projects and contributing to innovation in the tech space.

Skills

- Programming: Python, JavaScript, HTML, CSS, SQL
- Frameworks & Tools: React.js, Node.js, Express.js, Django, Flask, Git, Docker
- Data Science & Machine Learning: Pandas, NumPy, Scikit-Learn, TensorFlow (beginner)
- Databases: PostgreSQL, MongoDB
- Cloud & DevOps: AWS (basic), CI/CD Pipelines
- Soft Skills: Communication, Problem-Solving, Team Collaboration, Adaptability

---

Education

University of the People (Ongoing)
Bachelor's in Computer Science

WorldQuant University (Ongoing)
Data Science Courses

Jesi Scholarship Program (Ongoing)
Software Development Cohort

Biomedical Sciences Background

Work Experience

Digital Innovation Hub
Software Developer (Current)

- Building web applications and contributing to software projects that drive innovation.
- Developing full-stack solutions with modern frameworks.
- Collaborating on AI-driven ideas for digital transformation.

Projects & Experience

Smoke Masters – Co-Founder

- Launched a business delivering pre-cooked, seasoned meats tailored for health-conscious consumers.
- Pitched the idea at an agritech challenge, securing a ranking of 33rd out of 108 schools.
- Exploring AI integration for smart packaging and customer engagement.

Portfolio Development

- Building a portfolio showcasing full-stack development and data science projects.

Capstone Project (Jesi Scholarship)

- Developing a full-stack software solution as part of the Jesi program.

Certifications & Training

- DataCamp Courses (Ongoing)
- Online Certifications in Python, Machine Learning, and Web Development

---

Leadership & Extracurriculars

- Active contributor on Medium, LinkedIn, and Twitter, writing about tech, habits, and career growth.
- Passionate about mentoring and sharing knowledge with aspiring tech enthusiasts.

Interests

- Machine Learning & AI
- Tech for Social Impact
- Business & Startups
- Writing & Content Creation
